### Basic Site Information

City or Municipality:

BC Hydro will perform a preliminary risk assessment on up to three attachment options in a given search area. Please list your options in order of preference.

BC Hydro may consider equipment attachments to pole structures (either single or multi-pole wood or steel structures) above the energized conductors provided that the structures are replaced with a fibre-reinforced polymer (FRP) or designed steel pole. Wood pole replacement structures will not be considered.

Please do not access BC Hydro Right of Way without the express permission of BC Hydro Shared Assets.

Did you include a purchase order (PO) with this submission?	YES	NO	

## What's the Next Step?

Once BC Hydro's Shared Assets team receives your completed Transmission Cell Site Attachment New Request **Step 1** Form, we perform a preliminary risk assessment of the impact of your request on the BC Hydro Transmission System.

You will be notified if you are approved to proceed to the next step of the new attachment process. Step 2 starts with the submission of your project's Transmission Cell Site Attachment New Request **Step 2** Form along with the application attachments and a non-refundable \$5,000.00 (plus applicable taxes) submission fee. If you require site access, an additional fee may be required depending on the location of your site.

This submission fee can be paid by cheque and mailed to the address at the top of this form. If your company would like to use a Purchase Order (PO) to pay the fee, please include your PO with your completed **Step 1** Form. We will not invoice against your PO until the preliminary risk assessment is complete and your project is approved to proceed to **Step 2** of the new attachment process.

Please contact the Shared Assets Team at [transmission.attachments@bchydro.com](mailto:transmission.attachments@bchydro.com) if you have any questions.
