

# What you can expect on your bill

As a self-generation customer, the electricity you generate is first used by your home or business. Your net consumption of electricity from BC Hydro is recorded under inflow. When you generate more electricity than you consume, the excess generation is fed back to the grid and shown under outflow.

## Your bill highlights

**Your bill for May 11, 2024 to Jul 11, 2024**

- ✔ Thank you for your payment of \$11.47 on May 21, 2024.
- ✔ Your bill includes the B.C. Electricity Affordability Credit. This credit is based on your electricity use from April 1, 2023 through March 31, 2024 and will be applied on your bills through March 31, 2025. To learn more, including how the credit amount is calculated, visit [bchydro.com/billcredit](https://bchydro.com/billcredit).
- To track your electricity usage, visit [bchydro.com/login](https://bchydro.com/login).

Auto-pay amount

**\$9.89**

**Withdrawn on or after Jul 19, 2024**

## Net electricity usage over time

**10%** daily average inflow electricity compared to the same period last year

**20%** daily average outflow electricity compared to the same period last year

Did you know?

**You used a total of 924 kWh from May 11, 2024 to Jul 11, 2024.**

Use our online tracking tools to view your detailed electricity use by the month, week, day or even hour – up to the previous day. Visit [bchydro.com/login](https://bchydro.com/login).

## Your self-generation this period

As a self-generation customer, your smart meter runs in two directions: inflow (electricity from the grid) and outflow (electricity to the grid.) Here is how your net electricity usage is determined:

**CUSTOMER GENERATION ACCOUNT**  
 Previous balance **812 kWh**

## Interested in time-of-day pricing?

The optional tiered rate with time-of-day pricing is now available to residential customers.

Compare costs and see if it's right for you at [bchydro.com/rates](https://bchydro.com/rates)

As a self-generation customer, the total amount of electricity to be charged is your inflow minus your outflow minus the previous balance of generation.

- 1 Electricity inflow is **924 kWh**
- 2 Electricity outflow is **2,352 kWh**
- 3 Previous balance of generation is **812 kWh**
- 4 Total amount of electricity to be charged: **924 kWh – 2,352 kWh – 812 kWh = 0 kWh**
