Qualified product list for monitoring devices

This is a list of monitoring devices that qualify for customer-generation. To be eligible for customer-generation program, the monitoring device must meet the following technical certification requirements with a compatible inverter as an integrated system:

- UL 1741 (3rd Edition)
- UL1741 Certification Requirement Decision (CRD) for Power Control Systems (PCS)
- UL1741 Certification Requirement Decision (CRD) for Multimode (MM) Inverters

Note: Alternatively, once a revised UL standard is officially published that incorporates the above Certification Requirement Decisions (CRDs), the inverter system shall be tested and certified as a complete system in accordance with the latest applicable UL standard.

Monitoring device makes and models listed below have been reviewed and meet the requirements and certifications for customer-generation. This is not intended to be an exhaustive list. If there is a monitoring device that meets these requirements and is not listed below, please submit a request [here](#) to have the monitoring device reviewed.
